

NEW Vauxhall **Astra Van** **SEAT KIT** **AVAILABLE NOW**

**Quality rear seat kit built with M1
standard seatbelts and mountings**

Scot Seats have built a sturdy strong rear seat kit for the new October 2006 Vauxhall Astra Van.

Scot Seats have not chosen to go down the same route as one of their competitors with a cheap and not very cheerful seat kit. Scot Seats seat back is double wood lined with a steel strengthening bar to give the rear passengers protection from goods in the rear of the vehicle and when the seat is folded up it creates a half bulkhead to protect the driver and passenger from goods in the back of the vehicle.
